## **Outpatient Plastic Surgery Cash Payment Pricing (continued)**

- Facility pricing includes supplies reasonably necessary for the procedure. Additional supplies will be charged at cost plus 10%.
- Facility pricing does not include physician billing or implant costs.
- Additional charges will apply for additional hospital services. Any additional hospital services will be priced at 50% of billed charges.
- The pricing for each procedure includes a standard number of hours of operating room time. Time in excess of the standard procedure time will be billed at \$200 per additional 30 minutes. An additional 30 minutes is defined as each time block from 5 minutes to 30 minutes beyond the standard time for the procedure. For example, a facelift that requires the operating room for 7 hours and 43 minutes would result an additional charge of \$400 for two additional 30 minute time blocks.
